Kanyakumari, Tamil Nadu, India

Executive Summary

Aspiring Penetration Tester and Cloud Security Engineering Student specializing in Google Cloud Platform (GCP) infrastructure, vulnerability assessment, and secure software development. Combines technical expertise in Linux environments and Python automation with strong leadership skills. Distinguished by consistent success in high-stakes challenges, securing top rankings in multiple national-level hackathons and Capture The Flag (CTF) competitions.

Education

SRM Institute of Science and Technology, Tiruchirappalli Bachelor of Technology in Computer Science and Engineering (Cybersecurity)	Aug 2024 – Present
Guru Teg Bahadur Public School, Sangrur CBSE 12th Standard	2024
Guru Teg Bahadur Public School, Sangrur CBSE 10th Standard	2022

Technical Skills

Languages: Python, C++, Rust, Bash
Frameworks & Databases: React.js, Node.js, Express.js, Tailwind CSS, MongoDB, MySQL, Flutter (Mobile App Development)
Security & CTF Tools: Burp Suite, Metasploit, Nmap, Wireshark, Penetration Testing Frameworks, Quantum Cryptography
Cloud, DevOps & Emerging Tech: Google Cloud Platform (GCP), Docker, Kubernetes, Terraform, Linux, CI/CD Infrastructure, Blockchain, IoT
Platforms: TryHackMe, Hack The Box (HTB), HackTricks - Cryptography, Web Exploitation, Forensics, Reverse Engineering, Binary Exploitation, OSINT

Work Experience

SRM Institute of Science and Technology System Administrator	Trichy Aug 2025 – Present
- Manage and deploy enterprise-grade Electronic Design Automation (EDA) tools with a combined software portfolio value exceeding ₹2 Crores. - Spearhead the infrastructure migration of 40+ workstations from legacy systems to an officially licensed Red Hat Enterprise Linux (RHEL) 8.1 environment. - Execute complete tool reinstallations across the new RHEL network and author technical documentation for Standard Operating Procedures (SOPs).	
Institution Innovation Council Idea Validation Coordinator	SRMIST, Trichy Apr 2025 – Present
- Orchestrate the screening and validation lifecycle for 600+ student innovation projects, successfully guiding 80% of concepts from ideation to viable prototypes. - Advise 50+ student founders on technical feasibility and market viability, contributing to a 20% increase in successful prototype demonstrations.	
Organizer & Mentor (Pre-Ideathon)	Feb 2025
- Mentored 150+ student teams (400+ participants) in identifying problem statements. - Guided the development of 80+ innovative solutions with structured research abstracts.	
DC Infotech (Authorized Google Cloud Platform Partner) GCP Cloud Engineer Intern	Online Jul 2025 – Oct 2025
- Developed scalable cloud-based solutions on GCP, reducing deployment latency by 40% and optimizing resource costs for 3 high-impact client projects. - Managed cloud resource allocation and executed deployment tasks while maintaining 99.9% system uptime and zero deployment failures.	

Leadership & Activities

DarkLead!

Community Manager / Relations Officer

Remote

Apr 2025 – Present

- Architect and deploy custom CTF infrastructure for a competition hosting **800+ teams**.
- Direct public communications and provide technical support for large-scale cybersecurity initiatives.
- Negotiate and secure strategic sponsorships to fund workshops and expand community chapters.

CyberAnzen Club

Event Manager & Core Team Member

SRMIST, Trichy

Oct 2024 – Aug 2025

- Organized and executed 10+ technical workshops and CTF competitions with 500+ total participants.
- Directed cross-functional teams of 10+ members to secure sponsorships and execute events, increasing participation by 60%.
- Mentored 30+ members and conducted cybersecurity awareness campaigns reaching 500+ students.

Achievements & Certifications

- **1st Place – Cyber Shield 24-Hour Hackathon (MeitY, ISEA & CISA)** Mar 2026
Secured 1st place as Team 10.00% and won ₹50,000 by developing QAVACH, a post-quantum cryptography identity platform.
- **1st Place – Mirage CTF** Mar 2026
Captained Team DarkLead! to 1st place in the national-level Mirage CTF conducted by Amrita.
- **1st Place – Cyber Hackathon (Hack The Box, Chennai)** Oct 2025
Directed Team DarkLead! to victory among **600 teams** in a 48-hour IoT security hackathon, building an Industrial Control Systems (ICS) monitoring dashboard.
- **2nd Place – Deltabuild 24-Hour Hackathon** Mar 2026
Developed a Secure Healthcare Ecosystem.
- **2nd Place – IIT Petrichor (Code for Climate Change Hackathon)** Jan 2026
- **2nd Place – RootAccess CTF (IIEST Shibpur)** Jan 2026
- **2nd Place – Kyberastra Hackathon (Amrita Cyber Nation)** Sep 2025
- **3rd Place – Yuva CTF (CyberAnzen - SRMIST Trichy)** Sep 2025
- **National Rank 49 – Pentathon CTF (AICTE)** May 2025
- **Global Rank 74 – Hackfinity CTF (TryHackMe)** Apr 2025
- **Google Cloud Skills Boost** Feb 2025
Earned **70+ Skill Badges** and completed **246+ Labs & 96 Quizzes**, mastering GCP infrastructure and Kubernetes.

+ More certifications & awards available on my [LinkedIn Profile](#).

Projects

QAVACH

[Repo Link](#)

Architected a Post-Quantum Cryptography (PQC) identity platform using lattice-based algorithms, ensuring quantum-resistant secure credential verification for E-governance. Enables secure issuance and verification of citizen credentials using NIST-standardized PQC algorithms.

C.A.R.E.-X (Clinical Action and Response Engine)

[Repo Link](#)

Built a blockchain-integrated healthcare platform ensuring immutable patient record management and secure resource accessibility.

SwiftAutomate

[Repo Link](#)

Engineered an automation suite to streamline IT and OT security workflows, automating 100% of manual incident response workflows.

ASTRA API

[Repo Link](#)

Created an AI-driven API mapping Traditional Medicine terminology to ICD-11 standards using FHIR-compliant structures.

PhishGuard AI

[Repo Link](#)

Programmed a 56-feature AI phishing detection engine with real-time inference and a browser extension for instant alerts.

+ 20 more projects available on my [GitHub](#).
